Law Faculty Course Participants

RE: Goals for the “Intro to statistics for legal research” classes

Dear participants

Welcome to nine hours of ~~slog~~ critical thinking. My goals for this class are to enable you to do the following.

1. Use a computer to investigate the foundations of statistical analysis.
2. Confidently answer most of our quiz questions — please try this now at https://monash.az1.qualtrics.com/jfe/form/SV_6SuKzunX8FCxp7D
3. Extend your own knowledge on statistics, after the course. For example, you should be able to work out what the following cartoon is about.

Good luck. I will be available for additional support over the next month — I am happy to field questions after class and on email. And I will also be available for one-to-one consulting if you have specific empirical research projects.

Ian Hunt
